1. Introduction

1.1 Aim

The strategy aligns with our Higher Education Vision Statement: ‘South Devon College is passionate about providing excellent quality, accessible and employment focused Higher Education’.

It was written in conjunction with the Higher Education Strategy 2019-2024 and the College’s Employer Engagement Strategy 2017-2019.

The strategy aims to:

Establish a clearly articulated and prominent framework which identifies career development and employability as intrinsic to the student experience at University Centre South Devon (UCSD).

Engage and support students with a diverse range of needs and ambitions in managing their employability development throughout the student journey and beyond.

Grow co- and extracurricular opportunities for students to apply their knowledge and develop relevant skills and experience; supporting them to become well-rounded graduates.

1.2 Context

UCSD is committed to supporting all students into employment, highly skilled employment and/or further study through activities as part of and outside of their core programme.

UCSD’s progression rates are currently high compared to the national average, as the majority of our students are in further study (their Level 6 qualification) when surveyed for the Destinations of Leavers from Higher Education (DLHE) survey\(^1\). In the 2016/17 survey, 94.7% of UCSD respondents were in employment or further study (compared to 91% nationally\(^2\)). Of those in employment, 72.5% of UCSD graduates were in a professional or managerial job (compared to a national average of 73.9%\(^3\)).

---

\(^1\) The survey was replaced by Graduate Outcomes in 2018. The first cohort of UCSD students will be surveyed in September 2019, with data to be published in 2020.

\(^3\) [https://luminate.prospects.ac.uk/what-do-graduates-do](https://luminate.prospects.ac.uk/what-do-graduates-do)
Annual reviews of the Destination of Leavers from Higher Education (DLHE) survey are conducted by UCSD and monitored in Programme Committee meetings.

Students can access employability support through a range of activities delivered by the Higher Education Employability and Enterprise Co-ordinator (HEEEC). Current provision includes 1-1 appointments, promotion of work-related and volunteering opportunities, careers related events and awards. Students can also access a wealth of careers and employability resources through the UCSD Careers & Employability Moodle page. The HEEEC also works closely with programme teams to support and co-ordinate co- and extra-curricular activities such as bespoke volunteer programmes with local organisations.

We continue to utilise relationships with stakeholders including local employers, alumni and University of Plymouth’s Careers and Employability Hub to support provision.

Students also receive support with careers and employability within their programme. This support is typically embedded within dedicated modules and can include Curriculum Vitae (CV) development, visiting guest speakers, live projects, placements and additional qualifications. To facilitate this, programmes work with internal and external stakeholders including local employers and organisations, partners and Professional, Statutory and Regulatory bodies (PSRBs) where aligned to programmes.

In the wider context, the Teaching Excellence and Student Outcomes Framework (TEF), launch of Graduate Outcomes to replace DLHE and Access and participation plans, have placed an even greater focus on actively supporting student progression, graduate employability and positive outcomes.

2. Key objectives

2.1 Raise the profile of employability at UCSD

To achieve this, we will:

- Create a more visible employability presence within the University Centre, off-campus locations and online to promote employability and available support
- Enable students to improve understanding of the labour market and recruitment practices, through contact and collaboration with stakeholders including local employers, alumni and South Devon College’s JobShop
- Develop an integrated approach to raising the profile of Graduate Outcomes amongst students, graduates and staff
Capture and promote student and alumni employability success through mediums such as case studies

2.2 **Provide comprehensive support to enable students to develop their employability**

To achieve this, we will:

- Enable access to inclusive 1:1 employability support for students outside of their core programme
- Provide targeted employability and career development support to specific cohorts, including final year students
- Develop an ‘employability profile’ for all students to complete annually during induction/reinduction. The profile will capture employability data including work experience to date and career intentions, to inform provision and help track progress.
- Explore a more accessible platform through which to promote opportunities including part-time work and volunteering to students

2.3 **Engage students in managing employability throughout the student journey**

To achieve this, we will:

- Co-ordinate the development of a programme level employability offer. The offer will establish features of employability to be embedded across the programme at a minimum. It will be contextualised by subject area; supporting students to recognise how and where the programme develops employability
- Provide opportunities to recognise and celebrate students within UCSD who are actively engaged in developing employability, to inspire others
- Develop and promote co- and extra-curricular opportunities to enable students’ personal and professional development, such as the creation of a UCSD skills award
- Work in partnership with Programme Teams, Academic Outcomes, Support & Wellbeing, Helpzone and other relevant support services to enable students to access opportunities and recognise, reflect on and articulate the skills and qualities they are acquiring.

2.4 **Support students to progress into employment, highly skilled employment and/or further study.**

To achieve this, we will:
• Work closely with academic teams and support services to promote and help students access further study and employment opportunities
• Grow our alumni network through the Future First platform and utilise the network to input into student employability, such as developing graduate case studies to promote varied career pathways and advocating extra-curricular activities
• Support with the systematic review and monitoring of student outcomes at both institution and programme level to help inform employability initiatives
• Support the development of course level employability activity and the review of work-based learning as part of the Annual Monitoring Process. The HE Employability and Enterprise Co-ordinator will also attend stage 1 approvals in an advisory capacity.

2.5 Measure progress and achievement

To achieve this, we will:

• Monitor the success of extra-curricular interventions undertaken to enhance students’ employability
• Develop our reporting method for employer engagement activity within and external to the curriculum to increase staff engagement and access to employer engagement opportunities for all programmes of study, where relevant and possible
• Assess the feasibility of running a number of student focus groups to help shape employability provision at UCSD

3. Evaluation

We will measure the success of the strategy and its implementation through monitoring of:

• Student views including course reps, Student Consultative Forums, Student Satisfaction Surveys, programme meetings and evaluation forms.
• An increase in the number and range of opportunities available to students.
• Student participation in employability events, workshops, awards and engagement with promotions and resources including via Moodle and social media.
• Employer feedback through methods such as Employer Focus Groups, Sector Focus Groups and Industry Liaison Panels.
• Tutor engagement with initiatives and feedback on the level of active understanding among students of the skills they are developing.
• Interventions such as the employability profile to measure and map students’ perceptions of and confidence in their employability.

4. Future work

• A review of the Higher Education Strategy for Enhancing Employability will be undertaken in one year (May 2020).
• Key Performance Indicators (KPI) for employability enhancement will be established for 2019/20 implementation.
5. Appendices

Appendix 1: A visualisation of the strategy

**Student Employability Strategy 2019/20**

**Key Objectives**

*Raise the profile of employability at UCSD, by:*
- Creating a more visible online and physical employability presence
- Working with local employers, alumni etc to improve knowledge of the labour market & practices
- Increasing promotion of student/alumni employability success
- Making sure students and staff know about Graduate Outcomes

*Support students to develop their employability, by:*
- Providing access to inclusive extra-curricular 1:1 employability support and targeted group support
- Asking students to complete an annual ‘employability profile’ to track student progress
- Exploring more effective ways to promote opportunities for students e.g. part-time work

*Working in partnership with programme teams, personal tutors, Academic Outcomes, Support & Wellbeing, SDC JobShop, Marketing, University of Plymouth, local employers, alumni...*

*Engage students in managing employability throughout the student journey, by:*
- Helping students to recognise how and where their programme develops employability
- Recognising and celebrating those who are engaged in developing their and others’ employability
- Developing co-extra-curricular opportunities for students’ personal & professional development
- Enabling students to recognise and articulate the skills & qualities they acquire

*Support students to progress into employment, highly skilled employment and/or further study, by:*
- Providing IAG to help students access further study and employment opportunities
- Growing and using our alumni network to support careers and employability e.g. collecting graduate case studies to promote different career pathways
- Supporting the monitoring and review of student outcomes data
- Supporting course level employability activity

*Measure progress and achievement, by:*
- Monitoring the success of extra-curricular employability activity
- Increasing access to employer engagement for all programmes of study by developing an effective reporting method for employer engagement activity, where relevant and possible
- Trialling a student focus group to help shape employability provision at UCSD

*Evaluating success of the strategy through Course Reps, Student Consultative Forums, student participation in activities, employer feedback...*
